**RC-169:**

### for North America model

Front (main 2ch driven)  
60 W + 60 W (8 ohms, 20 Hz – 20 kHz with 0.08% THD)  
CENTER (center 1ch driven)  
60 W (8 ohms, 20 Hz – 20 kHz with 0.08% THD)  
REAR (rear 2ch driven)  
15 W + 15 W (8 ohms, 1 kHz with 0.3% THD)  
Front: 6 to 16 ohms  
Center: 8 to 16 ohms  
Rear: 8 to 16 ohms

150 mV / 47 k ohms PHONO (MM): 2.5 mV / 47 kohms  
10 Hz to 50 kHz:  $\pm 3 \text{ dB}$   
BASS:  $\pm 10 \text{ dB}$  at 100 Hz  
TREBLE:  $\pm 10 \text{ dB}$  at 10 kHz  
92 dB (BYPASS)  
 $\pm 1 \text{ dB}$  (20 Hz to 20 kHz)  
74 dB (A weighting, with 5 mV input)  
150 mV / 8 V  
0.03% (1 kHz, 1 V)

87.5 MHz ~ 108.0 MHz (for North America model)  
87.50 MHz ~ 108.00 MHz (for multi-voltage model)  
1.0  $\mu\text{V}$  (11.2 dBf)  
MONO 1.6  $\mu\text{V}$  (15.3 dBf)  
STEREO 23  $\mu\text{V}$  (38.5 dBf)  
MONO 80 dB  
STEREO 75 dB  
MONO 0.15%  
STEREO 0.3%

520 kHz ~ 1710 kHz (for North America model)  
522 kHz ~ 1611 kHz (for multi-voltage model)  
18  $\mu\text{V}$   
50 dB

1 Vp-p / 75 ohms  
2 Hz to 8 MHz +0, -3 dB

AC 120 V, 60 Hz (for North America model)  
AC 110 / 220 V, 50 / 60 Hz (for multi-voltage model)  
4.0 A (for North America model)  
W (for multi-voltage model)  
434 (W)  $\times$  142 (H)  $\times$  325 (D) mm (17-3/32"  $\times$  5-19/32"  $\times$  12-51/64")  
9.1 kg (20 lbs 1 oz)

Total buttons: 36  
DENON system code  
CD player: 6 buttons  
Cassette deck: 6 buttons  
AVR-800 fixed codes: 24 buttons  
Batteries: R6P / AA Type (two batteries)  
External dimensions: 55 (W)  $\times$  18 (H)  $\times$  180 (D) mm (2-11/64"  $\times$  45/64"  $\times$  7-3/32")  
Weight: 110 g (Approx. 4 oz) (including batteries)

### FOR ENGLISH READERS

- 1 POWER BUTTON
- 2 TUNING BUTTON
- 3 STANDBY LED
- 4 REMOTE CONTROL SENSOR
- 5 MFD
- 6 3CH. LOGIC MODE BUTTON
- 7 DELAY TIME BUTTON
- 8 DAT/TAPE MONITOR BUTTON
- 9 AUDIO FUNCTION BUTTON
- 10 VIDEO FUNCTION BUTTON
- 11 MASTER VOLUME
- 12 BALANCE control
- 13 TREBLE control
- 14 CENTER MODE BUTTON
- 15 BASS control
- 16 DOLBY PRO LOGIC MODE BUTTON
- 17 STUDIO MODE BUTTON
- 18 HALL MODE BUTTON
- 19 OUTPUT BUTTON
- 20 BYPASS BUTTON
- 21 VIDEO SELECT BUTTON
- 22 MEMORY BUTTON
- 23 PANEL BUTTON
- 24 TUNING MODE BUTTON
- 25 TUNING BAND SWITCH
- 26 TUNING BAND BUTTON
- 27 TUNER PRESET BUTTONS

### FÜR DEUTSCHE LESER

- 1 Netztaaste (POWER)
- 2 Abstimmstaste (TUNING)
- 3 Bereitschaftsanzeige (STANDBY LED)
- 4 Sensor für Fernbedienung
- 5 Multifunktions-Display (MFD)
- 6 3-Kanal Logik-Modus-Taste (3CH. LOGIC MODE)
- 7 Zeitverzögerungstaste (DELAY TIME)
- 8 DAT-/Cassettendeck-Überwachungstaste (DAT/TAPE MONITOR)
- 9 Audio-Funktionstaste (AUDIO FUNCTION)
- 10 Video-Funktionstaste (VIDEO FUNCTION)
- 11 Hauptlautstärke (MASTER VOLUME)
- 12 Höhen-Steuerung (BALANCE)
- 13 Höhen-Steuerung (TREBLE)
- 14 Mittel-Modus Taste (CENTER MODE)
- 15 Bass-Steuerung (BASS)
- 16 Dolby-Pro Logik-Modus Taste (DOLBY PRO LOGIC MODE)
- 17 Taste für Studio-Modus (STUDIO MODE)
- 18 Taste für Saal-Modus (HALL MODE)
- 19 Ausgangstaste (OUTPUT)
- 20 Bypass-Taste (BYPASS)
- 21 Videoauswahl-Taste (VIDEO SELECT)
- 22 Speicherstaste (MEMORY)
- 23 Konsolentaste (PANEL)
- 24 Abstimmungsmodus-Taste (TUNING MODE)
- 25 Abstimmungsmodus-Wahlschalter (Abstimmungsband-Tasten (TUNING BAND))
- 26 Abstimmungsband-Tasten (TUNING BAND)
- 27 Tuner-Voreinstellungstasten (TUNER PRESET)
- 28 Kopfhörerbuchsen (PHONES JACK)

### POUR LES LECTEURS FRANÇAIS

- 1 TOUCHE D'ALIMENTATION (POWER)
- 2 TOUCHE DE SYNTONISATION (TUNING)
- 3 TÊMOIN DE VIEILLE (STANDBY LED)
- 4 DÉTECTEUR DE TÉLÉCOMMANDE
- 5 MFD (affichage fluorescent multi-fonction)
- 6 TOUCHE DE MODE LOGIQUE 3 CANAUX (3CH. LOGIC MODE)
- 7 TOUCHE DE RETARD (DELAY TIME)
- 8 TOUCHE DAT/CONTROLÉ DE BANDE (DAT/TAPE MONITOR)
- 9 TOUCHE DE FONCTION AUDIO (AUDIO FUNCTION)
- 10 TOUCHE DE FONCTION VIDEO (VIDEO FUNCTION)
- 11 Commande de VOLUME GLOBAL (MASTER VOLUME)
- 12 Commande d'équilibre (BALANCE)
- 13 Commande des aigues (TREBLE)
- 14 TOUCHE DE MODE CENTRAL (CENTER MODE)

### PER IL LETTORE ITALIANO

- 1 TASTO DI ACCENSIONE
- 2 TASTO DI SYNTONIZZAZIONE
- 3 LED DI ATTESA
- 4 SENSORE A DISTANZA
- 5 Display MFD (display fluorescente multifunzione)
- 6 TASTO DEL MODO LOGIC 3CH. LOGIC
- 7 TASTO DELLA DURATA DEL RITARDO
- 8 Tasto di monitoraggio della piastra DAT/piastra a cassette (DAT/TAPE MONITOR)
- 9 TASTO DI FUNZIONE AUDIO
- 10 TASTO DI FUNZIONE VIDEO
- 11 VOLUME PRINCIPALE
- 12 CONTROLLO DEL BILANCIAMENTO
- 13 CONTROLLO DEGLI ACUTI

### PARA LECTORES DE ESPAÑOL

- 1 INTERRUPTOR DE ALIMENTACION
- 2 BOTONES DE SYNTONIZACION
- 3 LED DE MODO DE ESPERA
- 4 SENSOR DE CONTROL REMOTO
- 5 MFD (visualizador fluorescente multifunción)
- 6 BOTON SELECTOR DE MODO 3CH. LOGIC
- 7 BOTON SELECTOR DE TIEMPO DE RETARDO
- 8 BOTON DAT/TAPE MONITOR (DAT/TAPE MONITOR)
- 9 BOTON SELECTOR DE ENTRADA DE AUDIO
- 10 BOTON SELECTOR DE ENTRADA DE VIDEO
- 11 CONTROL PRINCIPAL DE VOLUMEN
- 12 Control de tonos agudos (TREBLE)
- 13 BOTON SELECTOR DE MODO CENTRAL

### VOOR NEDERLANDSTALIGE LEZERS

- 1 SPANNINGSTOETS (POWER)
- 2 AFSTEMTOETS (TUNING)
- 3 STANDBY-AANDUIDING (STANDBY LED)
- 4 AFSTANDSBEDIJNINGSENSOR
- 5 (REMOTE CONTROL SENSOR)
- 6 MFD (multifunctionele lichtgevende display)
- 7 3 KANAALS LOGIC-STANDTOETS (3CH. LOGIC MODE)
- 8 VERTRAGINGSTANDTOETS (DELAY TIME)
- 9 DAT/TAPE MONITOR TOETS (DAT/TAPE MONITOR)
- 10 VIDEOFUNKTIE TOETS (VIDEO FUNCTION)
- 11 HOOFDVOLUME (MASTER VOLUME)
- 12 Balansregelaar (BALANCE)
- 13 Hoge tonen-regelaar (TREBLE)
- 14 MIDDENSTANDTOETS (CENTER MODE)
- 15 Lage-tonenregelaar (BASS)

### FÖR SVENSKA LÄSARE

- 1 Strömbrytare (POWER)
- 2 Avstämningstangent (TUNING)
- 3 Beredskapsindikator (STANDBY)
- 4 Fjärrkontrollsensor (REMOTE CONTROL SENSOR)
- 5 MFD-display
- 6 Tangent för 3-kanalslogik (3CH. LOGIC MODE)
- 7 Tangent för reglering av tidsfördröjningen (DELAY TIME)
- 8 DAT-/DACKVALJARE (DAT/TAPE MONITOR)
- 9 Audiofunktionstangent (AUDIO FUNCTION)
- 10 Videofunktionstangent (VIDEO FUNCTION)
- 11 Ljudstyrkekontroll (MASTER VOLUME)
- 12 Balanskontroll (BALANCE)
- 13 Diskantkontroll (TREBLE)

- 15 Commande de graves (BASS)
- 16 DOUBLY PRO LOGIC MODE
- 17 TOUCHE DE MODE STUDIO
- 18 TOUCHE DE MODE SALLE (HALL)
- 19 TOUCHE DE SORTIE (OUTPUT)
- 20 TOUCHE DE DERIVATION VIDEO (VIDEO SELECT)
- 21 TOUCHE DE SELECTION VIDEO (VIDEO SELECT)
- 22 TOUCHE DE MEMOIRE (MEMORY)
- 23 TOUCHE DE PANNEAU (PANEL)
- 24 TOUCHE DE MODE DE SYNTONISATION (TUNING)
- 25 MODELSÉLECTEUR de SYNTONISATION (TUNING)
- 26 TOUCHE DE PANNEAU DE SYNTONISATION (TUNING)
- 27 BOUTON (Sélecteur de gamme de syntonisation) (TUNER PRESET)
- 28 PRISE CASQUE (PHONES)

- 29 TASTO DEL MODO CENTRALE
- 30 CONTROLLO DEI BASSI
- 31 TASTO DEL MODO DOLBY PRO LOGIC
- 32 TASTO DEL MODO STUDIO
- 33 TASTO DEL MODO HALL
- 34 TASTO DI USCITA
- 35 TASTO BYPASS
- 36 TASTO DI SELEZIONE VIDEO
- 37 TASTO DI MEMORIZZAZIONE
- 38 TASTO DEL DISPLAY
- 39 TASTO DEL MODO DI SYNTONIZZAZIONE
- 40 TASTO DELLA BANDA DI SYNTONIZZAZIONE
- 41 TASTI DI PRESELEZIONE DEL SYNTONIZZATORE
- 42 PRESA DELLE CUFFIE

- 43 Control de tonos bajos (BASS)
- 44 BOTON SELECTOR DE MODO DOLBY PRO LOGIC
- 45 BOTON SELECTOR DE MODO "STUDIO"
- 46 BOTON SELECTOR DE MODO "HALL"
- 47 BOTON DE SALIDA
- 48 BOTON DE OMISION
- 49 BOTON VIDEO SELECT
- 50 BOTON DE MEMORIA
- 51 BOTON DE INDICACION EN VISUALIZADOR (TUNING MODE)
- 52 Interruptor selector de modo de sintonización
- 53 Interruptor selector de banda de sintonización
- 54 TUNING BAND
- 55 BOTONES DE PRESINTONIZACION
- 56 CONECTOR PARA AURICULARES

- 57 DOLBY PRO LOGIC-STANDTOETS
- 58 (DOLBY PRO LOGIC MODE)
- 59 STUDIOSTANDTOETS (STUDIO MODE)
- 60 CONCERTZAAL-STANDTOETS (HALL MODE)
- 61 UITVOERTOETS (OUTPUT)
- 62 NEGEERTOETS (BYPASS)
- 63 VIDEOKEUZETOETS (VIDEO SELECT)
- 64 GEHEUGETOETS (MEMORY)
- 65 PANEELTOETS (PANEL)
- 66 AFSTEMSTANDTOETS (TUNING MODE)
- 67 (Afstemstand-keuzeschakelaar)
- 68 GOLFBAANDAFSTEMTOETS (TUNING BAND)
- 69 (Golfband-afstemkeuzeschakelaar)
- 70 TUNER-VOORKEUZETOETSEN (TUNER PRESET)
- 71 HOOFDTELEFOONAANSLUITING (PHONES)

- 72 Mittkanalsväljare (CENTER MODE)
- 73 Baskontroll (BASS)
- 74 DOLBY PRO LOGIC-tangent
- 75 STUDIO-tangent
- 76 HALL-tangent
- 77 Högtalaromkopplare (OUTPUT)
- 78 Förbikopplingstangent (BYPASS)
- 79 Videoväljare (VIDEO SELECT)
- 80 Minnestangent (MEMORY)
- 81 Panneltangent
- 82 Avstämningssomkopplare (TUNING MODE)
- 83 Frekvensbandväljare (TUNING BAND)
- 84 Snabbvalstangent (TUNER PRESET)
- 85 Hörurslutag (PHONES)

### Konformitätserklärung

Die DENON Electronic GmbH  
Haltestraße 32  
4030 Ratingen 1

Erklärt als Hersteller/Importeur, daß das in dieser Bedienungsanleitung beschriebene Gerät den Technischen Vorschriften für Ton- und Fernseh-Rundfunkempfänger nach der Amtsblattverfügung 868/1989 (Amtsblatt des Bundesministers für Post und Telekommunikation vom 31. 8. 1989) entspricht.

 <ul style="list-style-type: none"> <li>• Avoid high temperatures. Allow for sufficient heat dispersion when installed on a rack.</li> <li>• Vermeiden Sie hohe Temperaturen. Beachten Sie, daß eine zureichende Luftzirkulation gewährleistet ist, wenn das Gerät auf ein Regal gestellt wird.</li> <li>• Eviter des températures élevées. Tenir compte d'une dispersion de chaleur suffisante lors de l'installation sur une étagère.</li> <li>• Evitate di esposte l'unità a temperature alte. Assicurarsi che ci sia un'adeguata dispersione del calore quando l'unità è installata su un mobile per componenti audio.</li> <li>• Evite altas temperaturas. Permita la suficiente dispersión del calor cuando se instala en la consola. Vigile que exista suficiente ventilación en el lugar.</li> <li>• Zorg voor een degelijk hitteafvoer indien het apparaat op een rek wordt geplaatst.</li> <li>• Undvik höga temperaturer. Sikre god varmeledning ved montering i et rack.</li> <li>• Evite temperaturas altas. Conceda suficiente dispersão de calor quando o equipamento for instalado numa prateleira.</li> </ul>	 <ul style="list-style-type: none"> <li>• Keep the set free from moisture, water, and dust.</li> <li>• Halten Sie das Gerät von Feuchtigkeit, Wasser und Staub fern.</li> <li>• Protéger l'appareil contre l'humidité, l'eau et la poussière.</li> <li>• Tenete l'unità lontana dall'umidità, dall'acqua e dalla polvere.</li> <li>• Manténgalo alejado de la humedad, el agua y polvo.</li> <li>• Laat geen vochtigheid, water of stof in het apparaat binnendringen.</li> <li>• Hållt inte apparaten för fukt, vatten och damm.</li> <li>• Mantenha o aparelho livre de qualquer umidade, água ou poeira.</li> </ul>	 <ul style="list-style-type: none"> <li>• Do not let foreign objects in the set. Foreign objects in the set may cause damage.</li> <li>• Ne pas laisser des objets étrangers dans l'appareil. Les objets étrangers dans l'appareil peuvent causer des dommages.</li> <li>• Non introdurre che nessun oggetto estraneo all'interno dell'appareil.</li> <li>• No debe introducirse nada dentro del equipo.</li> <li>• Laat geen vreemde voorwerpen in dit apparaat vallen.</li> <li>• Se till att inga främmande föremål inte tränger in i apparaten.</li> <li>• Não deixe objetos estranhos no aparelho.</li> </ul>	 <ul style="list-style-type: none"> <li>• Handle the power cord carefully. Do not pull on the cord.</li> <li>• Gehen Sie vorsichtig mit dem Netzkabel um.</li> <li>• Halten Sie das Kabel am Stecker, wenn Sie den Stecker herausziehen.</li> <li>• Manipulez le cordon d'alimentation avec précaution.</li> <li>• Tenir la prise lors du débranchement du cordon.</li> <li>• Maneggiare il filo di alimentazione con cautela.</li> <li>• Agir per la spina quando scollegate il cavo dalla presa.</li> <li>• Manéje el cordón de energía con cuidado. No tire el cable cuando desconecte el cordón de energía.</li> <li>• Hanter het net snoer voorzichtig. Houd het snoer bij de stekker vast wanneer deze moet worden aan- of losgepluigd.</li> <li>• Håll i kablens net den toppas, från el uttaget.</li> <li>• Manuseie cu grijă cablul de alimentare la priză.</li> <li>• Segure a tomada ao desconectar o fio de energia.</li> </ul>	 <ul style="list-style-type: none"> <li>• Unplug the power cord when not using the set for long periods of time.</li> <li>• Wenn das Gerät eine längere Zeit nicht verwendet werden soll, trennen Sie das Netzkabel vom Netzstecker.</li> <li>• Débrancher le cordon d'alimentation lorsque l'appareil n'est pas utilisé pendant de longues périodes.</li> <li>• Desconecte el cordón de alimentación cuando no vaya a utilizar el equipo durante un tiempo.</li> <li>• Nimm altijd het netkabel uit het stopcontact wanneer het apparaat gedurende een lange periode niet wordt gebruikt.</li> <li>• Koppla ur nätkabeln om apparaten inte ska vara anslutna till elnätet under en lång period.</li> <li>• Desligue o fio condutor de força quando o aparelho não tiver que ser usado por um longo período.</li> </ul>	 <ul style="list-style-type: none"> <li>• Do not let insecticides, benzene, and thinner come in contact with the set.</li> <li>• Lassen Sie das Gerät nicht mit Insektiziden, Benzin oder Verdünnungsmitteln in Berührung kommen.</li> <li>• Ne pas mettre en contact des insecticides, du benzène et un diluant avec l'appareil.</li> <li>• Assicurarsi che l'unità non venga in contatto con insetticidi, benzolo o solventi.</li> <li>• No debe haber contacto con insecticidas, gasolina y diluyentes con el equipo.</li> <li>• Laat geen insectenverdelgende middelen, benzine of verdunder met dit apparaat in aanraking komen.</li> <li>• Se till att inte insektsmedel på spraybruk, bensen och thinner kommer i kontakt med apparatens hölje.</li> <li>• Não permita que inseticidas, benzena e thinner entrem em contato com o aparelho.</li> </ul>	 <ul style="list-style-type: none"> <li>• Never disassemble or modify the set in any way.</li> <li>• Versuchen Sie niemals das Gerät auseinanderzubauen oder auf jegliche Art zu verändern.</li> <li>• Ne jamais démonter ou modifier l'appareil d'une manière ou d'une autre.</li> <li>• Non smontare mai, né modificare l'unità in nessuna maniera.</li> <li>• Nooti ni apparat demontieren of op andere wijze modificeren.</li> <li>• De ventilationsöppningar och löstk öm inte byggs om den.</li> <li>• Nunca desmonte ou modifique o aparelho de alguma forma.</li> </ul>

## 14 TROUBLESHOOTING

If a problem should arise, first check the following:

1. Are the connections correct?
2. Have you operated the amplifier according to the Operating Instructions?
3. Are the speakers, turntable, and other components operating properly?

If the receiver is not operating properly, check the items listed in the table below. Should the problem persist, there may be a malfunction. Disconnect the power immediately and contact your store of purchase.

Symptom	Cause	Measures	Page
MFD not lit and sound not produced when power switch set to on	• Power cord not plugged in securely	• Check the insertion of the power cord plug.	8
MFD lit but sound not produced	• Speaker cords not securely connected	• Connect securely	14
	• OUTPUT button is off	• Press the OUTPUT button	17
	• Improper position of the audio function button	• Set to a suitable position.	15
	• Volume control set to minimum	• Turn volume up to suitable level.	15
	• MUTING is on	• Switch off MUTING	15
-PROTECT- display appears multi-function display	• Speaker terminals are short-circuited	• Switch power off, connect speakers properly, then switch power back on	14
	• Block the ventilation holes of the set	• Remove the obstruction and ventilate it well to cool the set	
	• The unit is operating at continuous high power conditions and/or inadequate ventilation	• Once the set is cooled down, turn the power back on.	
Sound produced only from one channel	• Incomplete connection of speaker cords	• Connect securely	14
	• Incomplete connection of input/output cords	• Connect securely	11-13
Positions of instruments reversed during stereo playback	• Left/right balance is off	• Adjust balance knob properly	15
Sound seems distorted	• Reverse connections of left and right speakers or left and right input/output cords	• Check left and right connections	12-14
Personal memory function does not work	• Rear level is too high	• Set the rear level to lower level	23, 25
Humming noise produced when record is playing	• DAT/TAPE monitor mode set	• Press the DAT/TAPE button to set the source	1/
Howling noise produced when volume is high	• Ground wire of turntable not connected properly	• Connect securely	12
	• Incomplete PHONO jack connection	• Connect securely	12
	• TV or radio transmission antenna nearby	• Contact your store of purchase.	-
	• Turntable and speaker systems too close together	• Separate as much as possible.	-
	• Floor is unstable and vibrates easily	• Use cushions to absorb speaker vibrations. If the floor is unstable, use insulators (commonly available).	-
Sound is distorted	• Stylus pressure too weak	• Apply proper stylus pressure.	-
	• Dust or dirt on stylus	• Clean stylus	-
	• Cartridge defective	• Replace cartridge	-
Volume is weak	• MC cartridge being used	• Replace with MM cartridge or use a head amplifier or step-up transformer.	12
Receiver does not operate properly when remote control unit is used	• Batteries dead	• Replace with new batteries.	-
	• Obstacle between receiver and remote control unit	• Move closer	10
	• Different button is being pressed	• Remove obstacle	10
	• "+" and "-" ends of battery inserted in reverse	• Press the proper button.	-
		• Insert batteries properly	-

## 15 LAST FUNCTION MEMORY

- This receiver is equipped with a last function memory which stores the input and output setting conditions as they were immediately before the power is switched off.
- This function eliminates the need to perform complicated resetting when the power is switched on.
- This receiver is also equipped with a back-up memory. This function provides approximately one week of memory storage with the power cord disconnected.

## 16 SPECIFICATIONS

- **Audio Section**  
(Power amplifier)  
Rated output:  
(All properties shown are only for the power amplifier stage.)  
Front (main 2ch driven) 60 W + 60 W (8 ohms, 20 Hz ~ 20 kHz with 0.08% THD)  
CENTER (center 1ch driven) 60 W (8 ohms, 20 Hz ~ 20 kHz with 0.08% THD)  
REAR (rear 2ch driven) 15 W + 15 W (8 ohms, 1 kHz with 0.3% THD)  
Output terminals:  
Front: 8 to 16 ohms  
Center: 8 to 16 ohms  
Rear: 8 to 16 ohms  
Line input (Each line input - FRONT SP OUT)  
Input sensitivity/impedance: 150 mV/47 k ohms PHONO (MM): 2.5 mV/47 kohms  
Frequency response: 10 Hz to 50 kHz: ±3 dB  
Tone control range: BASS: +10 dB at 100 Hz  
TREBLE: +10 dB at 10 kHz  
Signal-to-noise ratio 92 dB (BYPASS)  
Phono equalizer (PHONO input - REC OUT)  
RIAA deviation: ±1 dB (20 Hz to 20 kHz)  
Signal-to-noise ratio: 74 dB (A-weighting, with 5 mV input)  
Rated output/Maximum output: 150 mV/8 V  
Distortion factor: 0.03% (1 kHz, 1 V)
- **Tuner Section**  
[FM] (Note:  $\mu V$  at 75 ohms, 0 dB/  $= 1 \times 10^{-15}$  W)  
Receiving Range: 87.5 MHz ~ 108.0 MHz (for North America model)  
87.5 MHz ~ 108.00 MHz (for multi-voltage model)  
Usable Sensitivity: 1.0  $\mu V$  (11.2 dBf)  
50 dB Quieting Sensitivity: MONO 1.6  $\mu V$  (15.3 dBf)  
STEREO 23  $\mu V$  (38.5 dBf)  
Signal to Noise Ratio (HF-A): MONO 80 dB  
STEREO 75 dB  
Total Harmonic Distortion MONO 0.15%  
STEREO 0.3%  
[AM]  
Receiving Range: 520 kHz ~ 1710 kHz (for North America model)  
522 kHz ~ 1611 kHz (for multi-voltage model)  
Usable Sensitivity: 18  $\mu V$   
Signal to Noise Ratio: 50 dB
- **Video Section**  
Standard video jacks  
Input and output level/impedance: 1 Vp-p/75 ohms  
Frequency response: 2 Hz to 9 MHz: 0, -3 dB
- **General**  
Power supply: AC 120 V, 60 Hz (for North America model)  
AC 110/220 V, 50/60 Hz (for multi-voltage model)  
Power consumption: 4.0 A (for North America model)  
W (for multi-voltage model)  
Maximum external dimensions: 434 (W) x 142 (H) x 325 (D) mm (17.3/32" x 5.19/32" x 12.51/64")  
Weight: 9.1 kg (20 lbs 1 oz)
- **Remote control unit**  
System remote control  
RC-169:  
Total buttons: 36  
DENON system code: 6 buttons  
CD player: 6 buttons  
Cassette deck: 24 buttons  
AVR-800 fixed codes: 24 buttons  
Batteries: R6P/AA Type (two batteries)  
55 (W) x 18 (H) x 180 (D) mm (2.11/64" x 45/64" x 7.3/32")  
External dimensions: 110 g (Approx. 4 oz) (including batteries)  
Weight:

\* For purposes of improvement, specifications and design are subject to change without notice.

■ Using the Personal Memory

Surround mode settings and the input function can be stored at personal memory buttons "1" and "2", then recalled directly from any surround mode simply by pressing button "1" or "2".

1 Storing the setting in the personal memory

1. Set the desired surround mode and input function.

2. Press the personal memory button.

Remote control unit

(The memory setting mode is set and the indicator on the MFD flashes.)

3. Press the desired personal memory button ("1" or "2").

Remote control unit

4. "M 1 (2) SET" appears on the MFD indicating that the setting has been stored.

NOTE:

- The memory setting mode is set for 6 seconds. If any button other than personal memory button "1" or "2" is pressed, the memory setting mode is cancelled.

2 Recalling the personal memory

5. Press the personal memory button ("1" or "2") at which the desired setting was stored.

Remote control unit

6. The surround mode and input function switch automatically.

NOTES:

- Personal memory buttons "1" and "2" will not function during the tape monitor mode.
- The surround mode recalled with the PERSONAL MEMORY "1" or "2" button is the same as the mode selected with the surround mode button. Thus, if the parameters of the surround mode which was stored in the memory are cleared, when the mode is recalled it is set to the initial values.
- Upon shipment from the factory, the "DOLBY PRO LOGIC" mode is stored at personal memory "1", the "HALL" mode at personal memory "2". The input function is set to VDP/DBS for both "1" and "2".
- Do not press personal memory buttons "1" or "2" buttons during recording on the cassette deck.

■ Operations Possible in the Various Surround Modes

The following is a list of the buttons and functions which can be operated during the different surround modes. Figures in parentheses indicate adjustment ranges.

	OUTPUT	CENTER LEVEL	REAR LEVEL	CENTER MODE	3CH LOGIC	TEST TONE	DELAY TIME
BYPASS	○	×	×	△	×	×	×
DOLBY PRO LOGIC	○	○ (0--24dB)	○ (0--24dB)	○	○	○	○ (15--30ms)
PHANTOM	○	×	×	○ (0--24dB)	○	○	○ (15--30ms)
WIDE	○	○ (0--24dB)	○ (0--24dB)	○	○	○	○ (15--30ms)
DOLBY 3CH LOGIC	○	○ (0--24dB)	×	○	○	○	×
WIDE	○	○ (0--24dB)	×	○	○	○	×
HALL	○	○	○ (0--24dB)	△	×	×	○ (0--32ms)
STUDIO	○	○	○ (0--24dB)	△	×	×	○ (0--32ms)

○: Operation possible    ×: Operation not possible

1 Switches to the Dolby Pro (3CH) Logic for any modes other than Dolby Pro (3CH) Logic.  
This function is not available for the "HALL" and "STUDIO" modes.  
The delay time can be set by 1.5 ms step.

- The sound may be distorted for some sources if the rear level is raised during surround playback.  
If this happens, lower the rear level.

13 INITIALIZATION OF THE MICROPROCESSOR

When the indication of the MFD display is not normal or when the operation of the unit does not show the reasonable result, the initialization of the microprocessor is required by the following procedure.

1. Switch off the unit and remove the AC power cord from the wall outlet.
2. Hold the following 2 buttons of the main unit at the same time (as illustrated in the diagram below, ① AUDIO FUNCTION button, ② VIDEO FUNCTION button) and plug the power cord into the outlet.

3. Check that the entire MFD display is flashing with an interval of about 1 second, and release your fingers from the 2 buttons.
4. Switch on the unit and the microprocessor will be initialized. The input function is set to tuner with the bypass mode automatically.

NOTE:

- When the unit does not show the result of above 3 and 4, repeat the procedure from 1 again.
- When the microprocessor is initialized, all settings you have made are reset to the factory presettings.

Initial parameter values for the different modes

	OUTPUT	CENTER LEVEL	REAR LEVEL	CENTER MODE	3CH LOGIC	DELAY TIME
BYPASS	ON	—	—	—	—	—
DOLBY PRO LOGIC	ON	-12dB	—	NORMAL	OFF	21msec
HALL	ON	—	-12dB	—	—	21msec
STUDIO	ON	—	-12dB	—	—	21msec

- INPUT FUNCTION : TUNER
- Reception band : FM
- Reception mode : AUTO
- Reception frequency : 87.5MHz (for North American models)  
87.50MHz (for multi-voltage models)
- PERSONAL MEMORY 1 : VDP/DBS INPUT
- SURROUND MODE : DOLBY PROLOGIC
- PERSONAL MEMORY 2 : VDP/DBS INPUT
- SURROUND MODE : HALL

→ Continued

• **Speaker volume adjustment and Dolby Pro Logic mode**

To obtain the maximum surround effect, use the test tones to adjust the volume and balance of the speakers for the best balance for the listening position and so that the sound from all the speakers is heard at the same level. Set the master volume control to a suitable level, then adjust using the following procedure.

T.TONE  
Remote control unit

3. To decrease the level of the center speakers.

T.TONE  
Remote control unit

4. To increase the level of the rear speakers.

T.TONE  
Remote control unit

5. To decrease the level of the rear speakers.

T.TONE  
Remote control unit

6. Press the T.TONE button again.

T.TONE  
Remote control unit

For the Dolby 3CH Logic mode:  
[FR] → [C] → [FR] → [S]  
[FR] → [C] → [FR] → [FR]

**NOTES:**

- The test tone will not move on to the next channel when it is being emitted from the center channel and the level of the speakers is being adjusted, or when it is being emitted from the rear channel and the level of the rear speakers is being adjusted. It only moves to the next channel approximately two seconds after the level key has been released.

■ **Other Surround Modes**

- **HALL mode/STUDIO mode**

HALL  
Main unit

1. Set the HALL mode/STUDIO mode.

HALL  
Remote control unit

2. Play the desired software.

HALL  
Main unit

3. Adjust the volume.

HALL  
Remote control unit

4. Adjust the level of the center and rear channels. Adjust the levels according to the source, using the Dolby Pro Logic settings as reference.

HALL  
Remote control unit

5. Adjust the delay time as desired.

• **Setting the delay time**

The optimum delay time will differ depending on the listening position. Referring to the chart at right, set the optimum delay time for your room's space and seating position. For example, when the distance from the front speakers to the listening position is 6 m and that from the rear speakers to the listening position is 4 m, the optimum delay time will be 21 ms. The variable range of the delay time differs depending on the mode. For details about the variable range, see Page 25.

Listening position and optimum delay time for playback with Dolby Pro Logic surround

T.TONE  
Main unit

1. To increase the delay time.

T.TONE  
Remote control unit

2. To decrease the delay time.

- Once the delay time is set, there is no need to readjust it unless you change the speaker system or the listening position.
- It is available to memorize the adjusted values of delay time and rear (center) level for each surround mode.

12 SURROUND PLAYBACK

SURROUND modes

The surround modes are as follows:

1	Dolby Pro Logic	Use this when playing program sources recorded in Dolby Surround or Dolby Stereo.
2	HALL	Use this setting to create the atmosphere of a concert hall. There will be no output from the center speaker.
3	STUDIO	Use this setting to create the atmosphere of watching a live program in a studio. There will be no output from the center speaker.

- These effects may not be very pronounced for some sources.
- To adjust the speaker balance for the different surround modes, first adjust for the Dolby Pro Logic Surround mode as explained on page 23, then use the position of the center level and rear level controls at this time as a guide to adjust the balance for that surround mode.

Manufactured under license from Dolby Laboratories Licensing Corporation. Additionally licensed under one or more of the following patents: U.S. number 3,959,590; Canadian numbers 1,004,603 and 1,037,877. "Dolby," "Pro Logic," and the double-D symbol are trademarks of Dolby Laboratories Licensing Corporation.

Using Dolby Pro Logic Surround

- Speaker disposition and the Dolby Pro Logic Center mode
- Ideally, center speakers should be used when playing sources in Dolby Pro Logic Surround. Select the center mode according to your speaker system.

PRO LOGIC

Main unit

SURR MODE

Remote control unit

1. Set the Dolby Pro Logic mode.

3CH LOGIC

Main unit

3CH LOGIC

Remote control unit

2. Select the center mode.

NORMAL → PHANTOM

← WIDE

The mode changes as shown above.

Center Mode

**NORMAL mode**  
This mode is suited for an arrangement in which the center channel speaker is smaller than the left and right speakers. Signals below 100 Hz which have almost no effect on directional orientation are distributed to the left and right channels, whereas the center channel output signals greater than 100 Hz. As a result, the bass of the left and right channels increases the apparent depth of the sound.

**PHANTOM mode**  
Use this mode when center channel speaker is not used. A directional emphasis circuit provides signal reproduction which is electrically oriented to the center and this provides an exciting sound field for your enjoyment.

**WIDE mode**  
This mode is suited for an arrangement in which the center channel speaker is of the same grade as the left and right speakers. The entire sound band from low region to high is output to the center channel to provide an exciting sound field for your enjoyment.

Dolby 3CH. Logic (three-channel logic mode)

Select this mode when not using rear speakers.

3CH LOGIC

Main unit

3CH LOGIC

Remote control unit

1. Set the Dolby Pro Logic mode.

2. Press the 3CH LOGIC button.

3CH LOGIC

PRO LOGIC

The mode changes as shown at the left.

3. Select the center mode according to your speaker system.

NORMAL → WIDE

The mode changes as shown above.

3CH. LOGIC MODE

**3CH. LOGIC mode**  
Use this mode when rear channel speakers are not used. The rear channel information is reproduced by the front speakers.

# 11 LISTENING TO THE RADIO

## ■ Tuning

1. Set the input function to "TUNER".

2. Select the reception band.

There is a change as mentioned at the left, and indication ① inside the MFD changes.

3. Select the tuning mode.

The mode switches as shown at the left. When the auto mode is set, "AUTO" lights on the MFD ④.

**MANUAL**

Set the auto mode for automatic tuning, the manual mode for manual tuning.

4. Tune in the station.

**In the manual tuning mode:**  
Press the UP button once to increase the frequency by one step, the DOWN button once to decrease the frequency by one step.  
The frequency changes continuously when the button is held.  
The "TUNED" indicator ② lights on the MFD when a station is tuned in.

**In the auto tuning mode:**  
When the UP or DOWN button is pressed, automatic searching begins, and searching stops when a station is tuned in.

## NOTES:

- When in the auto tuning mode on the FM band, the "STEREO" indicator ③ lights on the MFD when a stereo broadcast is tuned in. At open frequencies, the noise is muted and the "TUNED" ② and "STEREO" ③ indicators turn off.
- When the manual tuning mode is set, FM stereo broadcasts are received in monaural and the "STEREO" indicator ③ turns off.

## ■ Storing stations at the preset buttons

1. Follow steps 1 to 4 under "Tuning" to tune in a station.

2. Press the MEMORY button.

3. Select the preset channels.

4. Press the MEMORY button that you want to store to memory.

## NOTES:

- The preset memory standby mode is set for 10 seconds when the MEMORY button is pressed.
- The preset memory standby mode is cancelled if any button other than preset buttons, the MEMORY button is pressed.

## ■ Recalling stations with the preset buttons

First store stations at the preset buttons using the above procedure.

3. Select the preset channels.

MFD display

■ Simulcast playback (playing different video and audio sources simultaneously)

1. Follow steps 1 to 3 under "Playing the program source".

2. Press the VIDEO SELECT button until the desired video source is displayed on the MFD.

The source switches as shown above.

3. Follow steps 4 to 8 under "Playing the program source".

**Cancelling simulcast playback**

- Press the VIDEO SELECT button again.
- Press the video function button on the main unit or remote control unit.

■ TAPE MONITOR FUNCTION

■ When playing a DAT or tape deck

Use this function to switch between the DAT or tape deck and the input (source) selected with the audio or video function buttons.

1. Follow steps 1 and 2 under "Playing the program source".

2. Select the deck to be played.

3. Follow steps 5 to 8 under "Playing the program source".

The source switches as shown at the left.

■ Monitoring the recording on a three-headed tape deck

The sound actually being recorded can be monitored during recording when a three-headed tape deck is used.

1. Select the deck to be monitored.

2. Follow steps 1 to 3 under "Playing the program source".

3. Start recording on the tape deck. For instructions, refer to the component's operating instructions.

4. Press the three-headed tape deck's source/tape button to monitor the recording.

The source switches as shown at the left.

NOTE:

- Also refer to the three-headed tape deck's operating instructions.

■ RECORDING

■ Recording the program source (recording the source currently being monitored)

1. Follow steps 1 to 3 under "Playing the program source".

2. Start recording on the tape or video deck. For instructions, refer to the component's operating instructions.

■ Simultaneous recording

The signals of the source selected with the function selector button are output simultaneously to the DAT/TAPE and VCR REC OUT jacks. If a total of two tape and/or video decks are connected and set to the recording mode, the same source can be recorded simultaneously on both decks. In addition, if the TAPE MONITOR (DAT/TAPE) button is pressed, the audio signals from the tape deck are output to the VCR AUDIO REC OUT jacks.

NOTE:

The recording source switches if the audio function, video function, personal memory "1" or "2" or tuner preset buttons are pressed during recording. Do not press these buttons during recording.

■ USING HEADPHONES

The sound from the speakers can be turned off using the OUTPUT button to listen to the sound over the headphones only, for example at night.

1. Press the OUTPUT button.

"H/P ONLY" appears on the MFD.

2. Insert the headphones' plug into the headphones' jack.

**Cancelling**

Either press the OUTPUT button again or press the POWER button to turn off the power.

Continued

7 PLAYBACK

Preparations for Playback

- Check the connections
- Check that all connections are proper, referring to the connections diagrams (pages 10 to 14).

Playing the program source (normal stereo playback)

1. Set the MASTER VOLUME control to the minimum.	4. Press the BYPASS button.
2. Press the POWER button to turn the power on. The muting mode is set for several seconds, after which the STANDBY LED flashes for several seconds.	5. Start playback the source. For instructions, refer to the source's operating instructions.
3. Select the source to be played. Example: AUDIO—TUNE Main unit PHONO CD TUNER The source switches as shown above MFD.	6. Adjust the volume. Turn the control clockwise to increase the volume, counterclockwise to decrease it. Press the button to increase the volume, the button to decrease it.
7. Adjust the left/right balance. Turn the control counterclockwise to reduce the volume of the right channel, clockwise to reduce the volume of the left channel.	8. Adjust the tone. Turn the control clockwise to increase the bass, counterclockwise to decrease it. Turn the control clockwise to increase the treble, counterclockwise to decrease it.

NOTE: The sound may be interrupted if switches are operated during playback. This is because the muting circuit is activated to prevent switching noise.

Speaker System Connections

Precautions when connecting speakers  
If a speaker is placed near a TV or video monitor, the colors on the screen may be distorted by the magnetic field. To prevent this, move the speaker away to a position where it does not have this effect.

<p>Preparing the cord</p> <ol style="list-style-type: none"><li>1. Peel off the sheath. </li><li>2. Twist the wires. </li></ol>	<p>Connecting the center and rear speaker terminals.</p> <ol style="list-style-type: none"><li>1. Press the lever. </li><li>2. Insert the cord and release the lever. </li></ol>
---	--

- This receiver can accommodate connections of a total of five speakers including one set of front speakers, one set of rear speakers, and one center speaker.
- Connect the speaker terminals with the speakers making sure that like polarities are matched (⊕ with ⊕, ⊖ with ⊖). Mismatching of polarities will result in weak central sound, unclear orientation of the various instruments, and the sense of direction of the stereo being impaired.
- When making connections, take care that none of the individual conductors of the speaker cord come in contact with adjacent terminals, with other speaker cord conductors, or with the rear panel.
- Speaker impedance
  - Speakers with an impedance of 6 to 16 ohms can be connected for use as front speakers 8 to 16 ohms can be connected for use as center and rear speakers.
  - Using speakers with an impedance other than the specified one may result in damage. Be sure to use speakers of the specified impedance.

# Video Section

# Audio Section

- Do not plug in the power cord until all connections have been completed.
- Be sure to connect the left and right channels properly (left with left, right with right).
- Insert the plugs securely. Incomplete connections will result in the generation of noise.
- Note that binding pin plug cords together with power cords or placing them near a power transformer will result in the introduction of hum or other noise.
- If hum or other noise is produced when the ground wire is connected, disconnect it.
- Noise or humming may be generated if a connected component is used independently without turning the power of the AVR-800 on. If this happens, turn on the power of the AVR-800.

## 5 REMOTE CONTROL UNIT

Following the procedure outlined below, insert the batteries before using the remote control unit.

### Range of operation of the remote control unit

#### NOTES:

- The remote control unit can be used from a straight distance of approximately 7 meters, but this distance will shorten or operation will become difficult if there are obstacles between the remote control unit and the remote control sensor, if the remote control sensor is exposed to direct sunlight or other strong light, or if operated from an angle.
- Neon signs or other devices emitting pulse-type noise nearby may result in malfunction, so keep the set as far away from such devices as possible.

### Inserting the batteries

#### NOTES

- Use only R6P, AA, UM-3 batteries for replacement.
- Be sure the polarities are correct. (See the illustration inside the battery compartment.)
- Remove the batteries if the remote control transmitter will not be used for an extended period of time.
- If batteries leak, dispose of them immediately. Avoid touching the leaked material or letting it come in contact with clothing, etc. Clean the battery compartment thoroughly before installing new batteries.
- When replacing the batteries, always replace both batteries with new ones.

### System codes

The system codes for Denon tape decks and CD players are set in this remote control unit.

## 6 CONNECTIONS

Connecting the antenna terminals

### ANTENNA INSTALLATION

#### FM ANTENNA

The supplied T-type indoor FM antenna (300 ohms) can be used inside wooden houses for receiving local FM stations and other strong FM signals. Stretch out the ends of the antenna and mount the antenna on the wall. The antenna should be oriented horizontally to receive the best reception. When the antenna is stretched out, the FM T-type antenna may not consistently ensure stable reception, due to environmental changes. In such cases, the FM T-type antenna should only be used temporarily until an outdoor FM antenna has been installed.

When connecting an outdoor FM antenna, the use of 75 ohm coaxial cable (3C-2V, 5C-2V) is strongly recommended. Using a 300-ohm feeder cable will cause noise and you will not be able to achieve the high sound quality the built-in tuner is capable of delivering.

#### LOOP ANTENNA

Assemble the included AM loop antenna as shown in the diagram, then place it in a position where reception is good. In some cases reception is better if the polarities are inverted. AM broadcasts will not be received well if the loop antenna is not connected or if it is connected but near a metal part.

Attach the loop antenna even when using an outdoor AM antenna.

Adjust the loop antenna to obtain optimum reception. Where broadcast stations are distant and only weak signals are received, the antenna should be moved. If it is less than an outdoor AM antenna.

#### NOTES

- This receiver has a full backup system. When the power is turned on, the INPUT SELECTOR buttons are set to the last mode set before the power was turned off.
- When using this receiver in close proximity to video equipment (TV, VCR, VDP, etc.), noise may be generated in AM broadcasts. To avoid this, keep the receiver as far away from other video components as possible. The noise is not reduced, but it is reduced if the receiver is moved away from the video components when listening to AM broadcasts.

#### Note to CATV system installer:

This reminder is provided to call the CATV system installer's attention to Article 820-40 of the NEC, which provides guidelines for proper grounding and, in particular, specifies that the grounding of the building and the grounding of the CATV system shall be connected to the same grounding point of the building as close to the point of cable entry as practical.

Continued

■ MULTI-VOLTAGE MODEL ONLY  
Make the following settings before connecting the components.

4 NAMES OF PARTS - 2 (Rear Panel)

- Always turn off the power of the various components when making connections. Also refer to the operating instructions for the other components.
- Do not plug in the power cord until all connections are completed.

Set the FREQUENCY STEP switch as described below.

- In the U.S.A. and Canada - set the switch to 100 kHz / 10 kHz side.
- With this setting, the frequency varies in 100 kHz steps in the range of 87.5 to 108.0 MHz (FM) and in 10 kHz steps in 520 to 1710 kHz (AM).
- Elsewhere - set the switch to 50 kHz / 9 kHz side.
- With this setting, the frequency varies in 50 kHz steps in the range of 87.50 to 108.0 MHz (FM) and in 9 kHz steps in 522 to 1611 kHz (AM).

Only switch the frequency when the power cord is unplugged. Plug in the power cord securely after switching the frequency.

2. Setting the line voltage

- The customer can set the VOLTAGE SELECTORS on the back panel for appropriate line voltage by using a screwdriver.
- Do not use excessive force in setting the VOLTAGE SELECTOR KNOB - you may damage it.
- If the VOLTAGE SELECTOR KNOB does not turn smoothly, contact your store of purchase.
- Be sure to set both voltage selectors to same position.

■ AC OUTLETS

**Connecting the AC Outlets**

**AC Outlets**

- SWITCHED (total capacity - 120W (1A))

The power to this outlet is turned on and off in conjunction with the POWER switch on the AVR-800. Audio equipment is switched between power and standby with the remote control unit. No power is supplied from these outlets when the AVR-800's power is at standby. Never connect equipment whose total capacity is above 120W (1A).
- UNSWITCHED (total capacity - 240W (2A))

Power is supplied from this outlet constantly, regardless of whether or not the AVR-800's power is on. Never connect equipment whose total capacity is above 240W (2A).

**NOTE:**

Only use the AC outlets for audio equipment. Never use them for hair driers, TVs or other electrical appliances.

2 NAMES OF PARTS - 1  
(Front Panel and Remote Control Unit)

3 MULTI FUNCTION DISPLAY (MFD)

The MFD indicates the operating modes when operations are performed and when PANEL button is pressed.

FLD (Fluorescent Light Display)

1 MULTI FUNCTION DISPLAY

Normally, the reception frequency is displayed when the function is set to tuner, and the surround mode is displayed when the function is set to other positions. The display also indicates various other information according to the buttons pressed.

2 TUNED (TUNED indicator)

This indicator lights when broadcast signals are received.

3 STEREO (Stereo Indicator)

The STEREO indicator will automatically light up when a stereo broadcast is received.

To check the settings of the different modes

1. Press the PANEL button.

Main unit

Either hold the PANEL button in or press it repeatedly to display the settings for the different modes.

FLD OFF

Turning the FLD off.

1. Press and hold in the PANEL button.

The FLD display changes continuously and finally turns off. Now when a button is pressed, the related display appears for a few seconds then turns off automatically.

2. Turning the FLD back on.

Press the PANEL button once again.

4 AUTO TUNING (AUTO TUNING Indicator)

This indicator lights when the auto tuning mode is selected by pressing the TUNING MODE button.

5 V. SELECT (VIDEO SELECT Indicator)

This indicator lights when the video monitor output is fixed in the video select mode.

6 DOLBY SURROUND Indicator

This indicator lights when DOLBY PRO LOGIC, 3CH, LOGIC are selected.

# NOTE ON USE

## Be careful of high temperatures

- Do not place the set in a location where it will be exposed to direct sunlight or near a heating appliance.

## Caution on rack/cabinet installation

- Avoid installing the set in a closed-type rack.
- When installing in a rack or cabinet, provide a sufficiently large ventilation opening to promote heat radiation.

## Do not allow foreign matter into the equipment

- Be especially careful of needles, hair pins, and coins getting into the set.

## Caution on humidity, water, and dust

- Do not place the set in a location where there is high humidity or a lot of dust.
- Flower vases or other items containing water should not be placed on top of the set.

## Care of the case

- Avoid the use of pesticides near the set as well as wiping the case with benzine, thinner or other solvents since they may cause a change in quality or color. Use a soft cloth when wiping away dirt and follow the instructions carefully when using chemically treated cloths.

## Care with the power cord

- When removing the plug from the receptacle, do not pull the power cord; be sure to hold the plug when removing it.

## Do not open the case

- Opening the top cover or the bottom plate of the case and inserting your hand is dangerous. Do not open the case.
- If some trouble arises with the performance of the set, remove the power plug soon and contact the store where the set was purchased or a nearby dealer.

## During your absence

- When not using the set for an extended period such as when taking a trip, be sure to disconnect the plug from the receptacle.

## For sets with ventilation holes

## Do not block the ventilation holes of the set

- Blocking of the ventilation holes will lead to damage of the set.
- The ventilation holes are very important for heat radiation from within the set. Care must be taken since placing an object against the holes will result in an extreme rise of temperature within the set.

- We greatly appreciate your purchase of the AVR-800.
- To be sure you take maximum advantage of all the features the AVR-800 has to offer, read these instructions carefully and use the set properly. Be sure to keep this manual for future reference should any questions or problems arise.

## ACCESSORIES

Check that the following parts are included in addition to the main unit:

- ① Operating instructions ..... 1
- ② Warranty (for North American model only) ..... 1
- ③ Remote control unit ..... 2
- ④ R6P/AA batteries ..... 2
- ⑤ AM loop antenna ..... 1
- ⑥ FM indoor antenna ..... 1

## INSTALLATION PRECAUTIONS

Using this receiver or other electronic equipment containing microprocessors simultaneously with a tuner or TV may result in noise in the sound or picture.

If this should happen, take the following steps:

- Install the receiver as far as possible from the tuner or TV set.
- Keep the antenna lines of the tuner or TV as far as possible from the receiver's power cord and connection cables.
- This problem is especially frequent when using indoor antennas or 300 ohm feeder lines. We recommend using outdoor antennas and 75 ohm coaxial cables.

## A note on stacking

For cooling purposes, do not place another AV component directly on top of the receiver. Be sure to leave a space of at least 10 cm.

## SAFETY PRECAUTIONS

The exclamation point within an equilateral triangle is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the appliance.

### CAUTION

TO PREVENT ELECTRIC SHOCK DO NOT USE THIS (POLARIZED) PLUG WITH AN EXTENSION CORD, RECEPTACLE OR OTHER OUTLET UNLESS THE BLADES CAN BE FULLY INSERTED TO PREVENT BLADE EXPOSURE.

## ATTENTION

POUR PREVENIR LES CHOCs ELECTRIQUES NE PAS UTILISER CETTE FICHE POLARISEE AVEC UN PROLONGATEUR UNE PRISE DE COURANT OU UNE AUTRE SORTIE DE COURANT. SAUF SI LES LAMES PEUVENT ETRE INSEREES A FOND SANS EN LAISSER AUCUNE PARTIE A DECOUVERT.

## SAFETY INSTRUCTIONS

1. **Read Instructions** – All the safety and operating instructions should be read before the appliance is operated.
  2. **Retain Instructions** – The safety and operating instructions should be retained for future reference.
  3. **Heed Warnings** – All warnings on the appliance and in the operating instructions should be adhered to.
  4. **Follow Instructions** – All operating and use instructions should be followed.
  5. **Water and Moisture** – The appliance should not be used near water – for example, near a bathtub, washbowl, kitchen sink, laundry tub, in a wet basement, or near a swimming pool, and the like.
  6. **Carts and Stands** – The appliance should be used only with a cart or stand that is recommended by the manufacturer.
- 
- 6A. An appliance and cart combination should be moved should be moved with care. Quick stops, excessive force, and uneven surfaces may cause the appliance and cart combination to overturn.
  7. **Wall or Ceiling Mounting** – The appliance should be mounted to a wall or ceiling only as recommended by the manufacturer.
  8. **Ventilation** – The appliance should be situated so that its location or position does not interfere with its proper ventilation. For example, the appliance should not be situated on a bed, sofa, rug, or similar surface that may block the ventilation openings, or placed in a built-in installation, such as a bookcase or cabinet that may impede the flow of air through the ventilation openings.
  9. **Heat** – The appliance should be situated away from heat sources such as radiators, heat registers, stoves, or other appliances (including amplifiers) that produce heat.
  10. **Power Sources** – The appliance should be connected to a power supply only of the type described in the operating instructions or as marked on the appliance.
  11. **Grounding or Polarization** – Precautions should be taken so that the grounding or polarization means of an appliance is not defeated.

• Always turn off the power of the various components when making connections. Also refer to the operating instructions for the other components.  
• Do not plug in the power cord until all connections are completed.

• Schalten Sie beim Vornehmen von Anschlüssen immer den Strom zu den verschiedenen Komponenten aus. Beziehen Sie sich darüberhinaus auf die Bedienungsanleitungen für die anderen Komponenten.  
• Schließen Sie das Netzkabel nicht an, bevor alle anderen Anschlüsse komplett ausgeführt worden sind.

• Mettre toujours les divers appareils hors circuit lors de la réalisation des connexions. Se reporter également aux modes d'emploi des autres appareils.

• Ne pas brancher le cordon d'alimentation avant d'avoir terminé toutes les connexions.  
• Spégnete sempre la corrente dei vari componenti prima di fare i collegamenti. Inoltre, fate riferimento al manuale di ciascun componente.

• Non inserire il filo di alimentazione finché tutti i collegamenti non saranno stati fatti.  
• Antes de hacer las conexiones, desconecte la alimentación a los distintos componentes. Consulte también los manuales de instrucciones de los componentes en uso.

• No conecte el cable de alimentación hasta haber finalizado todas las conexiones.  
• Schakel altijd de spanning van de verschillende componenten uit wanneer u aansluitingen maakt. Raadpleeg ook de gebruiksaanwijzing van de andere componenten.

• Steek het netsnoer pas in als alle aansluitingen tot stand zijn gebracht.

• Kom alltid ihåg att stänga av alla apparater innan du ändrar några anslutningar. Läs respektive bruksanvisningar för närmare upplysningar.

• Nätkabeln skall inte sättas i vägguttaget förrän alla andra anslutningar är klara.

Tangenter märkta "☆" motsvarar funktioner som bara kan utnyttjas via fjärrkontrollen.

■ We greatly appreciate your purchase of the AVR-800.  
 ■ To be sure you take maximum advantage of all the features the AVR-800 has to offer, read these instructions carefully and use the set properly. Be sure to keep this manual for future reference should any questions or problems arise.

## ACCESSORIES

Check that the following parts are included in addition to the main unit:

- ① Operating instructions ..... 1
- ② Warranty (for North American model only) ..... 1
- ③ Remote control unit ..... 1
- ④ R6P/AA batteries ..... 2
- ⑤ AM loop antenna ..... 1
- ⑥ FM indoor antenna ..... 1

## INSTALLATION PRECAUTIONS

Using this receiver or other electronic equipment containing microprocessors simultaneously with a tuner or TV may result in noise in the sound or picture.  
 If this should happen, take the following steps:

- Install the receiver as far as possible from the tuner or TV set.
- Keep the antenna lines of the tuner or TV as far as possible from the receiver's power cord and connection cables.
- This problem is especially frequent when using indoor antennas or 300 ohm feeder lines. We recommend using outdoor antennas and 75 ohm coaxial cables.

### A note on stacking

For cooling purposes, do not place another AV component directly on top of the receiver. Be sure to leave a space of at least 10 cm.

## 3 REMOTE CONTROL UNIT

Following the procedure outlined below, insert the batteries before using the remote control unit.

### Range of operation of the remote control unit

Point the remote control unit at the remote control sensor as shown on the diagram at the left.

#### NOTES:

- The remote control unit can be used from a straight distance of approximately 7 meters, but this distance will shorten or operation will become difficult if there are obstacles between the remote control unit and the remote control sensor. If the remote control sensor is exposed to direct sunlight or other strong light, or if operated from an angle, the remote control sensor may receive a false signal.
- Neon signs or other devices emitting pulse-type noise nearby may result in malfunction, so keep the set as far away from such devices as possible.

### Inserting the batteries

1. Open the bottom cover of the remote control unit and remove the battery cover.
2. Insert the two R6P/AA batteries, matching the ① and ② marks on the batteries with those in the case. Close the bottom cover until it clicks shut.

#### NOTES:

- Use only R6P, AA, UM-3 batteries for replacement.
- Be sure the polarities are correct. (See the illustration inside the battery compartment.)
- Remove the batteries if the remote control transmitter will not be used for an extended period of time.
- If batteries leak, dispose of them immediately. Avoid touching the leaked material or letting it come in contact with clothing, etc. Clean the battery compartment thoroughly before installing new batteries.
- When replacing the batteries, always replace both batteries with new ones.

### System codes

The system codes for Denon tape decks and CD players are set in this remote control unit.

**Tape deck system buttons**  
 With these buttons, a Denon remote controllable tape deck can be controlled directly.  
 For details, refer to the tape deck's operating instructions. Note that operation may not be possible for some models.

- ▶ : Forward play
- ◀ : Reverse play
- : Stop
- ◀▶ : Rewind
- ▶▶ : Fast-forward

A/B: Switching between decks A and B for double decks

**CD system buttons**  
 With these buttons, a Denon remote controllable CD player can be controlled directly.  
 For details, refer to the CD player's operating instructions. Note that operation may not be possible for some models.

- ▶ : Play
- : Pause
- : Stop
- ◀▶ : Auto search (reverse and forward)
- ▶▶ : CD changer, disc skip

## 4 MULTI FUNCTION DISPLAY (MFD)

The MFD indicates the operating modes when operations are performed and when PANEL button is pressed.

- FLD (Fluorescent Light Display)

- 1. MULTI FUNCTION DISPLAY**  
Normally the reception frequency is displayed when the function is set to tuner, and the surround mode is displayed when the function is set to other positions. The display also indicates various other information according to the buttons pressed.
- 2. TUNED (TUNED indicator)**  
This indicator lights when broadcast signals are received.
- 3. STEREO (Stereo Indicator)**  
The STEREO indicator will automatically light up when a stereo broadcast is received.

- To check the settings of the different modes

1. Press the PANEL button.

Main unit

Either hold the PANEL button in or press it repeatedly to display the settings for the different modes.

- FLD OFF  
Turning the FLD off.

- 1. Press and hold in the PANEL button.**  
The FLD display changes continuously and finally turns off. Now when a button is pressed, the related display appears for a few seconds then turns off automatically.
- 2. Turning the FLD back on.**  
Press the PANEL button once again.

## 5 CONNECTIONS

Connecting the antenna terminals

### ANTENNA INSTALLATION

- **FM ANTENNA**  
The supplied T-type indoor FM antenna (300 ohms) can be used inside wooden houses for receiving local FM stations and other strong FM signals. Stretch out the ends of the antenna and mount the antenna on the wall or ceiling where optimum reception is achieved. FM-type antennas may be affected by environmental changes. In such cases, the FM T-type antenna should be used temporarily until an outdoor FM antenna has been installed.  
When connecting an outdoor FM antenna, the use of 75 ohm coaxial cable (3C-2V, 5C-2V) is strongly recommended. Using a 300-ohm feeder cable will cause noise and you will not be able to achieve the high sound quality the built-in tuner is capable of delivering.
- **AM ANTENNA**  
Assemble the included AM loop antenna as shown in the diagram, then place it in a location where reception is good. The AM loop antenna is better if the position is inverted. AM broadcasts will not be received well if the loop antenna is not connected or if it is connected but near a metal part.  
Attach the loop antenna even when using an outdoor AM antenna.  
Adjust the loop antenna to obtain optimum reception. Where broadcast stations are distant and only weak signals are received, or where signals are blocked, it is best to install an outdoor AM antenna.

# Audio Section

- Do not plug in the power cord until all connections have been completed.
- Be sure to connect the left and right channels properly (left with left, right with right).
- Insert the plugs securely. Incomplete connections will result in the generation of noise.

## NOTE:

The receiver cannot be used with MC cartridges directly. Use a separate head amplifier or step-up transformer.

# Video Section

→ Continued

## 6 PLAYBACK

### ■ Preparations for Playback

- Check the connections
- Check that all connections are proper, referring to the connections diagrams (pages 7 to 9).

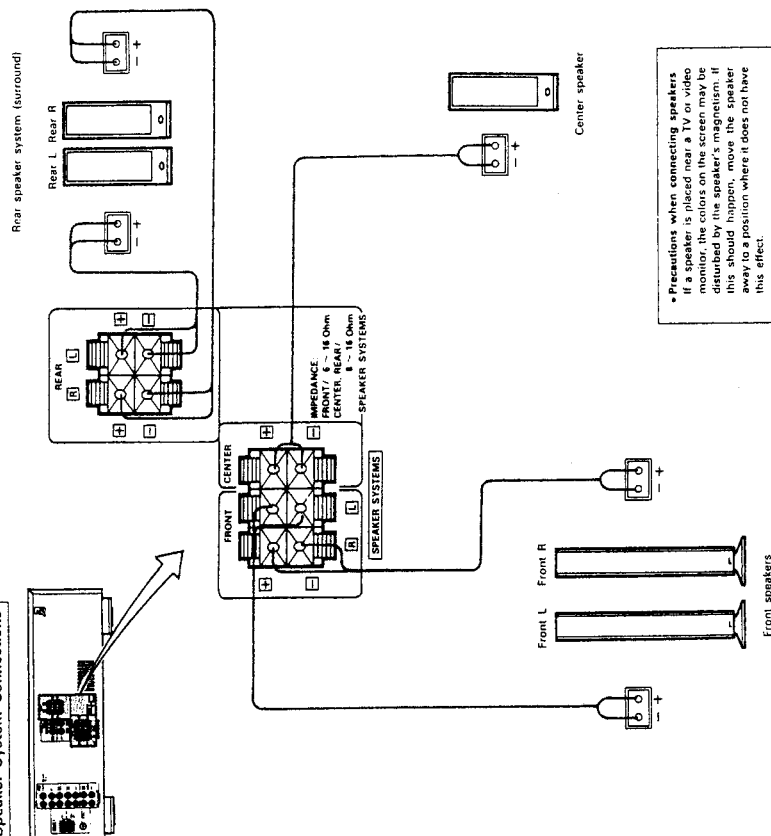

### ■ Playing the program source (normal stereo playback)

<p>1. Set the MASTER VOLUME control to the minimum.</p>	<p>4. Press the BYPASS button.</p>
<p>2. Press the POWER button to turn the power on. The muting mode is set for several seconds, after which the STANDBY LED flashes for several seconds.</p>	<p>5. Start playback the source. For instructions, refer to the source's operating instructions.</p>
<p>3. Select the source to be played. Audio function button Example: Main unit: PHONO, CD or TUNER can be selected directly. The source switch: as shown above MFD.</p>	<p>6. Adjust the volume. Turn the control clockwise to increase the volume, counterclockwise to decrease it.</p>
<p>7. Adjust the left/right balance. Turn the control counterclockwise to reduce the volume of the right channel, clockwise to reduce the volume of the left channel.</p>	<p>8. Adjust the tone. Turn the control clockwise to increase the bass, counterclockwise to decrease it. Turn the control clockwise to increase the treble, counterclockwise to decrease it.</p>

**NOTE:**  
The sound may be interrupted if switches are operated during playback. This is because the muting circuit is activated to prevent switching noise.

### Speaker System Connections

**\*Precautions when connecting speakers**  
If a speaker is placed near a TV or video monitor, the colors on the screen may be disturbed by the speaker's magnetism. If this should happen, move the speaker away to a position where it does not have this effect.

<p><b>Preparing the cord</b></p> <p>1. Peel off the sheath.</p>	<p><b>Connecting the center and rear speaker terminals.</b></p> <p>1. Press the lever.</p>
<p>2. Twist the wires.</p>	<p>2. Insert the cord and release the lever.</p>

- This receiver can accommodate connections of a total of five speakers including one set of front speakers, one set of rear speakers, and one center speaker.
- Connect the speaker terminals with the speakers making sure that like polarities are matched (⊕ with ⊕, ⊖ with ⊖). Mismatching of polarities will result in weak central sound, unclear orientation of the various instruments, and the sense of direction of the stereo being impaired.
- When making connections, take care that none of the individual conductors of the speaker cord come in contact with adjacent terminals, with other speaker cord conductors, or with the rear panel.
- Speaker impedance**
  - Speakers with an impedance of 6 to 16 ohms can be connected for use as front speakers 8 to 16 ohms can be connected for use as center and rear speakers.
  - Using speakers with an impedance other than the specified one may result in damage. Be sure to use speakers of the specified impedance.

# ■ Simulcast playback (playing different video and audio sources simultaneously)

1. Follow steps 1 to 3 under "Playing the program source".

2. Press the VIDEO SELECT button until the desired video source is displayed on the MFD.

The source switches as shown above.

3. Follow steps 4 to 8 under "Playing the program source".

## Cancelling simulcast playback

- Press the VIDEO SELECT button again.
- Press the video function button on the main unit or remote control unit.

# ■ Using the muting function

Use this to turn off the audio output temporarily.

1. Press the MUTING button.

This function can only be set from the remote control unit.

The STANDBY LED flashes when the muting function is set.

2. Press the MUTING button again.

The muting function is cancelled.

# 7 RECORDING

## ■ Recording the program source (recording the source currently being monitored)

1. Follow steps 1 to 3 under "Playing the program source".

2. Start recording on the tape or video deck.

For instructions, refer to the component's operating instructions.

### Simultaneous recording

The signals of the source selected with the function selector button are output simultaneously to the DAT/TAPE and VCR REC OUT jacks. If a total of two tape and/or video decks are connected and set to the recording mode, the same source can be recorded simultaneously on both decks. In addition, if the TAPE MONITOR (DAT/TAPE) button is pressed, the audio signals from the tape deck are output to the VCR AUDIO REC OUT jacks.

# 8 TAPE MONITOR FUNCTION

## ■ When playing a DAT or tape deck

Use this function to switch between the DAT or tape deck and the input (source) selected with the audio or video function buttons.

1. Follow steps 1 and 2 under "Playing the program source".

2. Select the deck to be played.

The source switches as shown at the left.

3. Follow steps 5 to 8 under "Playing the program source".

## ■ Monitoring the recording on a three-headed tape deck

The sound actually being recorded can be monitored during recording when a three-headed tape deck is used.

1. Select the deck to be monitored.

The source switches as shown at the left.

2. Follow steps 1 to 3 under "Playing the program source".

3. Start recording on the tape deck. For instructions, refer to the component's operating instructions.

4. Press the three-headed tape deck's source/tape button to monitor the recording.

NOTE:

- Also refer to the three-headed tape deck's operating instructions.

# 9 USING HEADPHONES

The sound from the speakers can be turned off using the OUTPUT button to listen to the sound over the headphones only, for example at night.

1. Press the OUTPUT button.

"H/P ONLY" appears on the MFD.

2. Insert the headphones' plug into the headphones' jack.

## Cancelling

Either press the OUTPUT button again or press the POWER button to turn off the power.

# 10 LISTENING TO THE RADIO

## Tuning

1 Set the input function to "TUNER".

2 Select the reception band.

3. Select the tuning mode.

4. Tune in the station.

There is a change as mentioned at the left, and indication ① inside the MFD changes.

The mode switches as shown at the left. When the auto mode is set, "AUTO" lights on the MFD ④.

MANUAL  
Set the auto mode for automatic tuning, the manual mode for manual tuning.

In the manual tuning mode:  
Press the UP button once to increase the frequency by one step, the DOWN button once to decrease the frequency by one step.  
The frequency changes continuously when the buttons are held in.  
The "TUNED" indicator ② lights on the MFD when a station is tuned in.  
In the auto tuning mode:  
When the UP or DOWN button is pressed, automatic searching begins, and searching stops when a station is tuned in.

- NOTES:
- When in the auto tuning mode on the FM band, the "STEREO" indicator ③ lights on the MFD when a stereo broadcast is tuned in. At open frequencies, the noise is muted and the "TUNED" ② and "STEREO" ③ indicators turn off.
  - When the manual tuning mode is set, FM stereo broadcasts are received in monaural and the "STEREO" indicator ③ turns off.

## Storing stations at the preset buttons

1. Follow steps 1 to 4 under "Tuning" to tune in a station.

2. Press the MEMORY button.

3. Select the preset channels.

4. Press the MEMORY button that you want to store to memory.

The "CH" indicator on the MFD flashes.

## Recalling stations with the preset buttons

First store stations at the preset buttons using the above procedure.

3. Select the preset channels.

### NOTES:

- The preset memory standby mode is set for 10 seconds when the MEMORY button is pressed.
- The preset memory standby mode is cancelled if any button other than preset buttons, the MEMORY button is pressed.

→ Continued

# • Speaker volume adjustment and Dolby Pro Logic mode

To obtain the maximum surround effect, use the test tones to adjust the volume and balance of the speakers for the best balance for the listening position and so that the sound from all the speakers is heard at the same level. Set the master volume control to a suitable level, then adjust using the following procedure.

1. Press the T.TONE button.

Test tones are produced from the speakers in the order shown below, at 4 second intervals for the first two cycles, 2 second intervals after that.

For the Dolby 3CH Logic mode:

→ [FL] → [C] → [FR] → [S] → [EL] → [FC] → [ER] → [R]

2. To increase the level of the center speakers.

3. To decrease the level of the center speakers.

4. To increase the level of the rear speakers.

5. To decrease the level of the rear speakers.

6. Press the T.TONE button again.

Cancelling

## NOTES:

- The test tone will not move on to the next channel when it is being emitted from the center channel and the level of the center speakers is being adjusted, or when it is being emitted from the rear channel and the level of the rear speakers is being adjusted. It only moves on to the next channel approximately two seconds after the level key has been released.

## ■ Other Surround Modes

- HALL mode / STUDIO mode

1. Set the HALL mode / STUDIO mode.

2. Play the desired software.

3. Adjust the volume.

4. Adjust the level of the center and rear channels. Adjust the levels according to the source, using the Dolby Pro Logic settings as reference.

5. Adjust the delay time as desired.

HALL mode

STUDIO mode

MASTER VOL

# • Setting the delay time

The optimum delay time will differ depending on the listening position. Referring to the chart at right, set the optimum delay time for your room's space and seating position. For example, when the distance from the front speakers to the listening position is 6 m and that from the rear speakers to the listening position is 4 m, the optimum delay time will be 21 ms. The variable range of the delay time differs depending on the mode. For details about the variable range, see Page 14.

1. To increase the delay time.

2. To decrease the delay time.

DELAY

DELAY

- Once the delay time is set, there is no need to readjust it unless you change the speaker system or the listening position.
- It is available to memorize the adjusted values of delay time and rear (center) level for each surround mode.

■ Using the Personal Memory

Surround mode settings and the input function can be stored at personal memory buttons "1" and "2". Then recalled directly from any surround mode simply by pressing button "1" or "2".

1 Storing the setting in the personal memory

1. Set the desired surround mode and input function.

2. Press the personal memory button.

(The memory setting mode is set and the indicator on the MFD flashes.)

3. Press the desired personal memory button ("1" or "2").

4. "M 1 (2) SET" appears on the MFD indicating that the setting has been stored.

NOTE:

- The memory setting mode is set for 6 seconds. If any button other than personal memory button "1" or "2" is pressed, the memory setting mode is cancelled.

2 Recalling the personal memory

5. Press the personal memory button ("1" or "2") at which the desired setting was stored.

6. The surround mode and input function switch automatically.

NOTES:

- Personal memory buttons "1" and "2" will not function during the tape monitor mode.
- The surround mode recalled with the PERSONAL MEMORY "1" or "2" button is the same as the mode selected with the surround mode button. Thus, if the parameters of the surround mode which was stored in the memory are cleared, when the mode is recalled it is set to the initial values.
- Upon shipment from the factory, the "DOLBY PRO LOGIC" mode is stored at personal memory "1". The "HALL" mode at personal memory "2". The input function is set to VDP/DBS for both "1" and "2".
- Do not press personal memory buttons "1" or "2" buttons during recording on the cassette deck.

■ Operations Possible in the Various Surround Modes

The following is a list of the buttons and functions which can be operated during the different surround modes. Figures in parentheses indicate adjustment ranges.

	OUTPUT	CENTER LEVEL	REAR LEVEL	CENTER MODE	3CH LOGIC	TEST TONE	DELAY TIME
BYPASS	O	X	X	2 <sup>1</sup>	X	X	X
DOLBY PRO LOGIC	O	O (0~-24dB)	O (0~-24dB)	O	O	O	O (15~30ms)
PHANTOM	O	X	X	O	X	O	O (15~30ms)
WIDE	O	O (0~-24dB)	O (0~-24dB)	O	O	O	O (15~30ms)
DOLBY 3CH LOGIC	O	O (0~-24dB)	X	O	O	O	X
HALL	O	O (0~-24dB)	X	O	O	O	X
STUDIO	O	X	X	2 <sup>1</sup>	X	X	O (0~30ms)

O: Operation possible X: Operation not possible

<sup>1</sup> Switches to the Dolby Pro (3CH) Logic for any modes other than Dolby Pro (3CH) Logic. The level of the center and rear channels can be adjusted by 2 dB step. The delay time can be set by 1.5 ms step.

- The sound may be distorted for some sources if the rear level is raised during surround playback. If this happens, lower the rear level.

12 INITIALIZATION OF THE MICROPROCESSOR

When the indication of the MFD display is not normal or when the operation of the unit does not show the reasonable result, the initialization of the microprocessor is required by the following procedure.

- Switch off the unit and remove the AC power cord from the wall outlet.
- Hold the following 2 buttons of the main unit at the same time (as illustrated in the diagram below, ① AUDIO FUNCTION button, ② VIDEO FUNCTION button) and plug the power cord into the outlet.

- Check that the entire MFD display is flashing with an interval of about 1 second, and release your fingers from the 2 buttons.
- Switch on the unit and the microprocessor will be initialized. The input function is set to tuner with the bypass mode automatically.

NOTE:

- When the unit does not show the result of above 3 and 4, repeat the procedure from 1 again.
- When the microprocessor is initialized, all settings you have made are reset to the factory presettings.

Initial parameter values for the different modes

	OUTPUT	CENTER LEVEL	REAR LEVEL	CENTER MODE	3CH LOGIC	DELAY TIME
BYPASS	ON	—	—	—	—	—
DOLBY PRO LOGIC	ON	-12dB	-12dB	NORMAL	OFF	21msec
HALL	ON	—	-12dB	—	—	21msec
STUDIO	ON	—	-12dB	—	—	21msec

- INPUT FUNCTION : TUNER
- Reception band : FM
- Reception mode : AUTO
- Reception frequency : 87.5MHz (for North American models)
- Reception frequency : 87.50MHz (for multi-voltage models)
- PERSONAL MEMORY 1 INPUT : VDP/DBS
- PERSONAL MEMORY 2 INPUT : DOLBY PROLOGIC
- PERSONAL MEMORY 1 SURROUND MODE : VDP/DBS
- PERSONAL MEMORY 2 SURROUND MODE : HALL

# 13 TROUBLESHOOTING

If a problem should arise, first check the following:

1. Are the connections correct?
  2. Have you operated the amplifier according to the Operating Instructions?
  3. Are the speakers, turntable, and other components operating properly?
- If the receiver is not operating properly, check the items listed in the table below. Should the problem persist, there may be a malfunction. Disconnect the power immediately and contact your store of purchase.

Symptom	Cause	Measures	Page
MFD not lit and sound not produced when power switch set to on.	• Power cord not plugged in securely.	• Check the insertion of the power cord plug.	5
MFD lit but sound not produced	• Speaker cords not securely connected.	• Connect securely.	9
	• Improper position of the audio function button.	• Set to a suitable position.	9
	• Volume control set to minimum.	• Turn volume up to suitable level.	9
	• MUTE is on.	• Switch off MUTE.	9
-PROTECT- display appears multi-function display	• Speaker terminals are short-circuited.	• Switch power off, connect speakers properly, then switch power back on.	9
	• Block the ventilation holes of the set.	• Turn off the set's power, then ventilate it.	-
	• Poor ventilation conditions with high power conditions and/or inadequate ventilation.	• Once the set is cooled down, turn the power back on.	-
Sound produced only from one channel.	• Incomplete connection of speaker cords.	• Connect securely.	9
	• Incomplete connection of input/output cords.	• Connect securely.	7, 8
	• Left/right balance is off.	• Adjust balance knob properly.	9
Positions of instruments reversed during stereo playback.	• Reverse connections of left and right speakers on left and right input/output cords.	• Check left and right connections.	8, 9
Sound seems distorted	• Rear level is too high.	• Set the rear level to lower level.	13, 14
Personal memory function does not work	• DAT/Tape monitor mode set.	• Press the DAT/TAPE button to set the source.	10
Humming noise produced when record is playing	• Ground wire of turntable not connected properly.	• Connect securely.	8
	• Incomplete PHONO jack connection.	• Connect securely.	8
	• TV or radio transmission antenna nearby.	• Contact your store of purchase.	-
Howling noise produced when volume is high.	• Turntable and speaker systems too close together.	• Separate as much as possible.	-
	• Floor is unstable and vibrates easily.	• Use cushions to absorb speaker vibrations transmitted by floor. If turntable is not equipped with insulators, use audio insulators (commonly available).	-
Sound is distorted	• Stylus pressure too weak.	• Apply proper stylus pressure.	-
	• Dust or dirt on stylus.	• Check stylus.	-
	• Cartridge defective.	• Replace cartridge.	-
Volume is weak	• MC cartridge being used	• Replace with MM cartridge or use a head amplifier or step-up transformer.	8
Receiver does not operate properly when remote control unit is used.	• Batteries dead.	• Replace with new batteries.	6
	• Remote control unit too far from receiver.	• Move closer.	6
	• Obstacle between receiver and remote control unit.	• Remove obstacle.	6
	• Different button is being pressed	• Press the proper button.	6
	• Battery not inserted - ends of battery inserted in reverse.	• Insert batteries properly.	6

# 14 LAST FUNCTION MEMORY

- This receiver is equipped with a last function memory which stores the input and output setting conditions as they were immediately before the power is switched off.
- This function eliminates the need to perform complicated resetting when the power is switched on.
- This receiver is also equipped with a back-up memory. This function provides approximately one week of memory storage with the power cord disconnected.

# 15 SPECIFICATIONS

- **Audio Section**  
(Power amplifier)  
Rated output:  
(All properties shown are only for the power amplifier stage.)  
Front (main 2ch driven) 60 W + 60 W (8 ohms, 20 Hz ~ 20 kHz with 0.1% THD)  
CENTER (center 1ch driven) 60 W (8 ohms, 20 Hz ~ 20 kHz with 0.1% THD)  
REAR (rear 2ch driven) 15 W + 15 W (8 ohms, 1 kHz with 0.5% THD)  
Output terminals:  
Front: 6 to 16 ohms  
Rear: 8 to 16 ohms  
Line input (Each line input - FRONT SP OUT)  
Input sensitivity/impedance: 150 mV/47 k ohms PHONO (MM): 2.5 mV/47 k ohms  
Frequency response: 10 Hz to 50 kHz: ±3 dB  
Tone control range: BASS: ±10 dB at 100 Hz  
TREBLE: ±10 dB at 10 kHz  
Signal-to-noise ratio: 92 dB (BYPASS)  
Phono equalizer (PHONO input - REC OUT) ±1 dB (20 Hz to 20 kHz)  
RIAA deviation: 74 dB (A weighting, with 5 mV input)  
Signal-to-noise ratio: 150 mV/8 V  
Rated output/Maximum output: 150 mV/8 V  
Distortion factor: 0.03% (1 kHz, 1 V)  
• **Tuner Section**  
[FM] (note: µV at 75 ohms, 0 dBf - 1 × 10<sup>-16</sup> W)  
Receiving Range: 87.50 MHz ~ 108.00 MHz  
Usable Sensitivity: 1.0 µV (11.2 dBf)  
50 dB Quiet Sensitivity: MONO 1.6 µV (15.3 dBf)  
STEREO 23 µV (38.5 dBf)  
Signal to Noise Ratio (HF-A): MONO 80 dB  
STEREO 75 dB  
Total Harmonic Distortion MONO 0.4%  
STEREO 0.5%  
[AM]  
Receiving Range: 522 kHz ~ 1611 kHz  
Usable Sensitivity: 18 µV  
Signal to Noise Ratio: 50 dB  
• **Video Section**  
Standard video jacks  
Input and output level/impedance: 1 Vp-p/75 ohms  
Frequency response: 2 Hz to 8 MHz ±0, -3 dB  
• **General**  
Power supply: AC 230 V, 50 Hz (for Europe model)  
AC 240 V, 50 Hz (for U.K. model)  
Power consumption: 200 W  
Maximum external dimensions: 434 (W) × 142 (H) × 325 (D) mm (17.3/32" × 5.6/19.32" × 12.8/51.64")  
Weight: 9.1 kg (20 lbs 1 oz)  
• **Remote control unit**  
System remote control  
RC-169:  
Total buttons: 36  
DENON system code  
CD player: 6 buttons  
Cassette deck: 6 buttons  
AVR 800 fixed codes: 24 buttons  
Batteries: R6P/AA Type (two batteries)  
External dimensions: 55 (W) × 18 (H) × 180 (D) mm (2.1/64" × 0.7/32" × 7.1/32")  
Weight: 110 g (Approx. 4 oz) (including batteries)

• For purposes of improvement, specifications and design are subject to change without notice.

MEMO:

## WIRE ARRANGEMENT

In case of wires require unclaspings or loosening to move the location to perform adjustment or part replacement, be sure to rearrange them neatly to restore properly in the same location as they were originally placed, or causing to produce a noise may occasionally occur.

## DISASSEMBLY

(To reassemble reverse disassembly)

### 1. Top Cover

Remove 4 screws ① and 2 screws ②.

### 3. Front Mold Panel

- (1) Pull out Volume knob ④ and 3 round knobs ⑤.
- (2) Remove 4 nuts ⑥ and nut ⑦.
- (3) Remove 3 screws ⑨.

### 2. Front Aluminium Panel

Remove 3 screws ③ and undo hooks at 3 places.

### 4. Rear Panel

- (1) Disconnect cord bush ⑩.
- (2) Remove 5 screws ⑪, and 10 screws ⑫, and a screw ⑬.

\* Screws ⑫ is tighten.

## ADJUSTMENT

### ● TUNER SECTION

#### CONNECTION DIAGRAM OF MEASURING INSTRUMENTS

### ● FM

### ● AM

## FM/MPX ALIGNMENT

Step	Alignment Item	Tuning Frequency Setting	Input			Output			Adjust		Remarks
			Type	Frequency	Input Level	Modulation	Coupling	Type	Connect to	Points	
1	Tuning Center	98.0MHz (98.00)	FM SSG	98.0 MHz (98.00)	60 dBμ	None	Antenna Terminal	Digital Voltmeter	T.P. 1,2	T4	Function : FM Mode : Auto ± 50mV

( ) are Europe model.

## AM ALIGNMENT

Step	Alignment Item	Tuning Frequency Setting	Input			Modulation	Coupling	Output			Remarks
			Type	Frequency	Input Level			Type	Connect to	Points	
1	Receiving Band Alignment	520 KHz (522 KHz)	AM SSG	520 KHz (522 KHz)	Input Level is not over to work A.G.C.	400 Hz 30%	Loop Antenna	Electric DC Voltmeter	C13 (+ Side) GND	T1 (OSC)	Function : AM 1.0 V ± 100mV
		1710 KHz (1611 KHz)	AM SSG	1710 KHz (1611 KHz)	Input Level is not over to work A.G.C.	400 Hz 30%	Loop Antenna	Electric DC Voltmeter	C13 (+ Side) GND		Function : AM less than 9.0V (check the voltage)
2	Tracking Alignment	600 KHz (603 KHz)	AM SSG	600 KHz (603 KHz)	Input Level is not over to work A.G.C.	400 Hz 30%	Loop Antenna	Audio V.M.	TAPE REC (L) -1	T1 (ANT)	Function : AM Maximum Output
		1400 KHz (1404 KHz)	AM SSG	1400 KHz (1404 KHz)	Input Level is not over to work A.G.C.	400 Hz 30%	Loop Antenna	Audio V.M.	TAPE REC (C) -1		Function : AM Maximum Output (check)

( ) are Europe model.

**● Initiating (Memory clearing) Method**

To clear memory contents of microcomputer and restore to the initial state, take the following steps;

1. Press power switch, turn off power of the unit, and set to standby mode.
2. Pull out power cord from wall outlet temporarily.
3. Insert power cord into outlet while simultaneously pressing two keys of AUDIO and VIDEO.
4. Press power switch to confirm that memory contents are cleared.

By completion of the above, the initial state is restored. In case the memory can not be cleared due to some reasons, repeat steps 1 through 3.

## ● AUDIO SECTION

### Idling Current (1U-2650-1)

Required measurement equipment: DC Voltmeter

#### Arrangement

(1) Avoid direct blow from an air conditioner or an electric fan, and adjust the unit at normal room temperature 15°C ~ 30°C. (59°F ~ 86°F).

#### (2) Presetting

- |                               |   |
|-------------------------------|---|
| ● POWER (Power source switch) | → OFF   |
| ● MODE (Mode button)          | → BY PASS   |
| ● FUNCTION (Function button)  | → CD  |
| ● VOLUME (Volume control)     | → 0: fully counterclockwise (  min.) |
| ● BASS, TREBLE (Tone control) | → 0: (Controls to center)   |
| ● SPEAKERS (Speaker terminal) | → No load (Do not connect speaker, dummy resistor, etc.)  |

#### Adjustment

- (1) Remove top cover and set VR401, VR301 and VR302 of 1U-2650-1 or 1U-2650B-1 (Main Unit) at counterclockwise fully.
- (2) Connect DC Voltmeter to test points (Lch T.P.302, Rch T.P.301, CENTER ch T.P.401).
- (3) Connect power cord to AC Line, and turn power switch "ON".
- (4) Allow 15 minutes, and turn VR301, VR302 and VR401 clockwise (  ) and adjust the TEST POINTS voltage to 1.5 mV  $\pm$  0.5 mV DC.
- (5) After 2 minutes from preset, turn VR301, VR302 and VR401 to set the voltage to 3 mV  $\pm$  0.5mV DC.

TC9176P (SU: IC262)

**LM7001M**  
(SU: IC003)

\* (NC) pin : Use at opened.

**Terminal Description**

$\overline{\text{SYNC}}$  : Clock for controller (400 kHz)  
XIN, XOUT : X'tal OSC (7.2MHz)  
FMIN, AMIN : Station oscillation signal input.  
CE, CL, DATA : Data input.  
BO1, BO2, BO3: Band data output. BO1 is feasible for time base output (8Hz).  
VDD1, VDD2, VSS: Power supply. (VDD2 is for back-up)  
PD1, PD2 : Charge pump output.

**Data input**

$t_1 > 1.5 \mu\text{s}$  (X'tal at 7.2MHz)  
 $t_2 < 1.5 \mu\text{s}$

Input from D0.

D0	D1	D2	D3	D4	D5	D6	D7	D8	D9	D10	D11	D12	D13	T0	T1	B0	B1	B2	TB	R0	R1	R2	S
----	----	----	----	----	----	----	----	----	----	-----	-----	-----	-----	----	----	----	----	----	----	----	----	----	---

- (1) D0 (LSB)~D13 (MSB) :Frequency dividend data  
For FMIN, use D0~D13; for AMIN, use D4~D13.

D0	D1	D2	D3	D4	D5	D6	D7	D8	D9	D10	D11	D12	D13
1	0	1	0	0	0	0	0	0	1	0	1	1	1
LSB													MSB
x	x	x	x	0	0	0	0	1	0	1	1	1	1
				LSB									MSB

→ FMIN Frequency dividend number = 14853

→ AMIN Frequency dividend number = 928

- (2) T0, T1 : For test of LSI(0,0)

Table of LC7822 Terminal Function

Name of Terminal	I/O	Equivalent Internal Circuit	Function of Terminal																					
VDD, VSS, VEE			Power terminal.																					
L1 ~ L8, R1 ~ R8 LCOM1 ~ LCOM4, BCOM1 ~ BCOM4		Refer to block diagram	In/Out terminal of analog switch.																					
CL, DI, CE	I		Serial data input terminal (Schmidt buffer). CL = Clock input terminal. DI = Data input terminal. CE = Chip enable terminal.																					
S	I		Selection terminal for using of two. Address will be shifted as per below table when switching S terminal to L or H. <table border="1" data-bbox="686 1384 1259 1509"><tr><th rowspan="2">Name of Item</th><th rowspan="2">S Terminal</th><th colspan="4">Address</th></tr><tr><th>A0</th><th>A1</th><th>A2</th><th>A3</th></tr><tr><td rowspan="2">LC7822</td><td>L</td><td>0</td><td>1</td><td>0</td><td>1</td></tr><tr><td>H</td><td>1</td><td>1</td><td>0</td><td>1</td></tr></table>	Name of Item	S Terminal	Address				A0	A1	A2	A3	LC7822	L	0	1	0	1	H	1	1	0	1
Name of Item	S Terminal	Address																						
		A0	A1	A2	A3																			
LC7822	L	0	1	0	1																			
	H	1	1	0	1																			
RES	I		Reset terminal. Condition of analog switch is not fixed at the time of turning on the power. When shift this terminal to L, all analog switches become OFF.

# NOTE FOR PARTS LIST

- Part indicated with the mark "●" are not always in stock and possibly to take a long period of time for supplying, or in some case supplying of part may be refused.
- When ordering of part, clearly indicate "1" and "I" (I) to avoid mis-supplying.
- Ordering part without stating its part number can not be supplied.
- Part indicated with the mark "★" is not illustrated in the exploded view.
- Not including Carbon Film  $\pm 5\%$ , 1/4W Type in the P.W.Board parts list. (Refer to the Schematic Diagram for those parts.)

## WARNING:

Parts marked with this symbol  have critical characteristics.  
Use ONLY replacement parts recommended by the manufacturer.

## ● Resistors

Ex.: RN	14K	2E	182	G	FR
Type	Shape and performance	Power	Resistance	Allowable error	Others
RD : Carbon RC : Composition RS : Metal oxide film RW : Winding RN : Metal film RK : Metal mixture	2B : 1/8W 2E : 1/4W 2H : 1/2W 3A : 1W 3D : 2W 3F : 3W 3H : 5W	F : $\pm 1\%$ G : $\pm 2\%$ J : $\pm 5\%$ K : $\pm 10\%$ M : $\pm 20\%$	P : Pulse-resistant type NL : Low noise type NB : Non-burning type FR : Fuse-resistor F : Lead wire forming		

### ● Resistance

1 8 2  $\Rightarrow$  1800 ohm = 1.8 kohm  
Indicates number of zeros after effective number.  
2-digit effective number.

• Units: ohm

1 R 2  $\Rightarrow$  1.2 ohm  
1-digit effective number.  
2-digit effective number, decimal point indicated by R.

• Units: ohm

## ● Capacitors

Ex.: CE	04W	1H	2R2	M	BP
Type	Shape and performance	Dielectric and per- strength	Capacity	Allowable error	Others
CE : Aluminum foil electrolytic CA : Aluminum solid electrolytic CS : Tantalum electrolytic CQ : Film CK : Ceramic CC : Ceramic CP : Oil CM : Mica CF : Metallized CH : Metallized	0J : 6.3V 1A : 10V 1C : 16V 1E : 25V 1V : 35V 1H : 50V 2A : 100V 2B : 125V 2C : 160V 2D : 200V 2E : 250V 2H : 500V 2J : 630V	F : $\pm 1\%$ G : $\pm 2\%$ J : $\pm 5\%$ K : $\pm 10\%$ M : $\pm 20\%$ Z : $\pm 80\%$ A : $\pm 20\%$ P : $\pm 100\%$ C : $\pm 0.25\text{pF}$ D : $\pm 0.5\text{pF}$ A : Others	HS : High stability type BP : Non-polar type HR : Ripple-resistant type DL : For charge and discharge HF : For assuring high frequency U : UL part C : CSA part W : UL-CSA type F : Lead wire forming		

### ● Capacity (electrolyte only)

2 2 2  $\Rightarrow$  2200 $\mu\text{F}$   
Indicates number of zeros after effective number.  
2-digit effective number.

• Units:  $\mu\text{F}$

2 R 2  $\Rightarrow$  2.2 $\mu\text{F}$   
1-digit effective number.  
2-digit effective number, decimal point indicated by R.

• Units:  $\mu\text{F}$

### ● Capacity (except electrolyte)

2 2 2  $\Rightarrow$  2200pF = 0.0022 $\mu\text{F}$   
(More than 2) — Indicates number of zeros after effective number.  
2-digit effective number.

• Units:  $\mu\text{F}$

2 2 1  $\Rightarrow$  220pF  
(0 or 1) — Indicates number of zeros after effective number.  
2-digit effective number.

• Units: pF

• When the dielectric strength is indicated in AC, "AC" is included after the dielectric strength value.

## 1U-2652-2 VOLUME UNIT

## NOTES

ALL RESISTANCE VALUES IN OHM. k=1,000 OHM, M=1,000,000 OHM  
 ALL CAPACITANCE VALUES IN MICRO FARAD. P=MICRO-MICRO FARAD  
 EACH VOLTAGE AND CURRENT ARE MEASURED AT NO SIGNAL INPUT  
 CONDITION.  
 CIRCUIT AND PARTS ARE SUBJECT TO CHANGE WITHOUT PRIOR  
 NOTICE.

## WARNING:

Parts marked with this symbol  have critical characteristics.  
 Use ONLY replacement parts recommended by the manufacturer.

## CAUTION:

Before returning the unit to the customer, make sure you make either (1) a leakage current check or (2) a line to chassis resistance check. If the leakage current exceeds 0.5 milliamps, or if the resistance from chassis to either side of the power cord is less than 240 kohms, the unit is defective.

## WARNING:

DO NOT return the unit to the customer until the problem is located and corrected.

## NOTE FOR PARTS LIST

- Part indicated with the mark "●" are not always in stock and possibly to take a long period of time for supplying, or in some case supplying of part may be refused.
- When ordering of part, clearly indicate "I" and "I" (i) to avoid mis-supplying.
- Ordering part without stating its part number can not be supplied.
- Part indicated with the mark "★" is not illustrated in the exploded view.

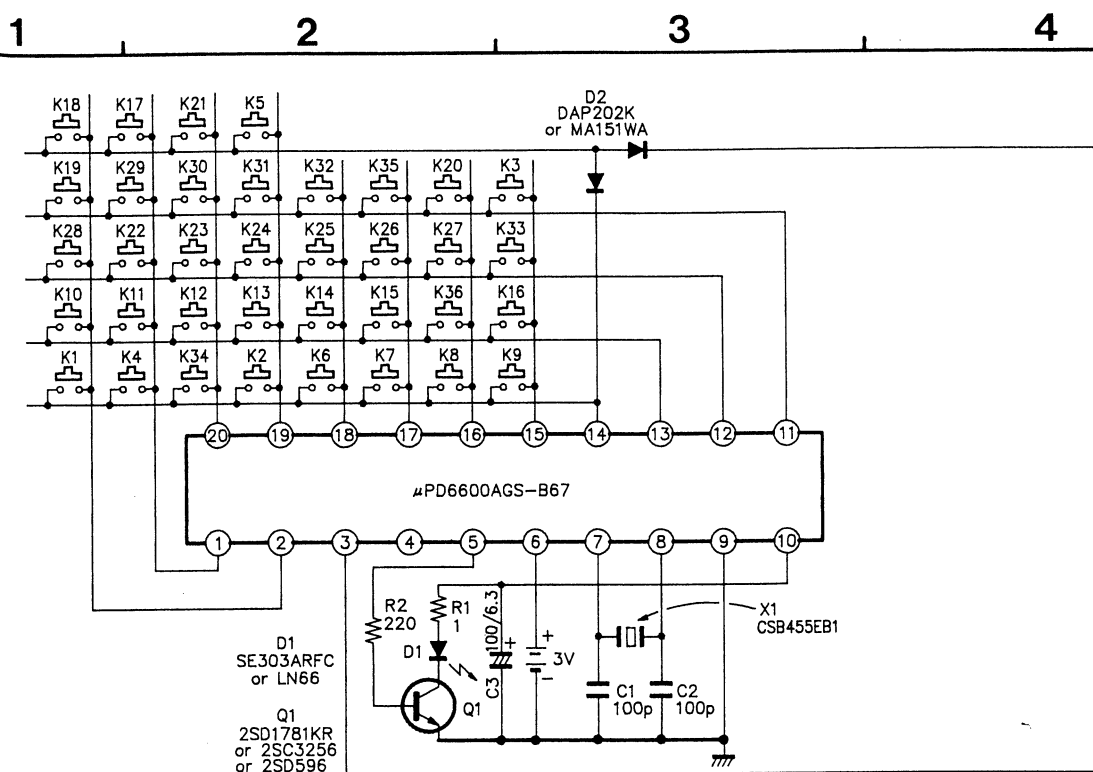

## WARNING:

Parts marked with this symbol  have critical characteristics.  
Use ONLY replacement parts recommended by the manufacturer.

## REMOTE CONTROL (RC-169)

### SCHEMATIC DIAGRAM

## SPECIFICATIONS

1. When each Key is pressed double transmission is not performed. When one side is released from double pressed state, transmit code on unreleased side.

## NOTES

ALL RESISTANCE VALUES IN OHM. K=1,000 OHM, M=1,000,000 OHM  
ALL CAPACITANCE VALUES IN MICRO FARAD. P=MICRO-MICRO FARAD  
EACH VOLTAGE AND CURRENT ARE MEASURED AT NO SIGNAL INPUT CONDITION.  
CIRCUIT AND PARTS ARE SUBJECT TO CHANGE WITHOUT PRIOR NOTICE.

# NOTE FOR PARTS LIST

- Part indicated with the mark "●" are not always in stock and possibly to take a long period of time for supplying, or in some case supplying of part may be refused.
- When ordering of part, clearly indicate "1" and "I" (i) to avoid mis-supplying.
- Ordering part without stating its part number can not be supplied.
- Part indicated with the mark "★" is not illustrated in the exploded view.
- Not including Carbon Film ±5%, 1/6W, 1/4W Type in the P.W.Board parts list. (Refer to the Schematic Diagram for those parts.)

# WARNING:

Parts marked with this symbol  have critical characteristics.  
Use ONLY replacement parts recommended by the manufacturer.
